

10. The pivoting assembly of claim 8 wherein the equipment mount is a bow mount

11. A pivoting assembly with a mount for holding hunting equipment and a clamp for attaching the assembly to a tube of an ATV extension kit, the assembly comprising:

a first means for pivoting where the first pivoting means is lockable and where the first pivoting means is attached to the equipment mount;

a second means for pivoting where the second pivoting means is lockable and where the second pivoting means is attached to the clamp; and

a shaft connecting the two pivoting means.

PIVOTING ASSEMBLY FOR HOLDING A GUN OR A BOW

Abstract of the Disclosure

An apparatus for holding a gun or a bow securely to an all terrain vehicle. .

The apparatus has one or more adjustable support arms each having a quick release and lock mechanism. The support arms serve as a way to allow the gun or bow to fit closely to the contour of the vehicle.
